Cykel AI PLC

("Cykel AI" or the "Company")

Cykel AI Accepted into NVIDIA Connect

Cykel AI PLC (LSE: CYK) is pleased to announce its acceptance into NVIDIA Connect, marking another strategic advancement in the Company's technological capabilities. NVIDIA Connect is a free program that helps software development companies and service providers accelerate time-to-market by leveraging the latest technological innovations from NVIDIA. Members have access to developer resources, technical guidance, preferred pricing, and marketing opportunities.

NVIDIA Connect is expected to equip Cykel AI with tailored development resources, accelerated product development capabilities and direct access to an extensive network of industry innovators. The Company intends to benefit from personalised SDK recommendations, advanced technical training and early access to NVIDIA's latest AI technologies and solutions.

The programme also offers preferential pricing structures that are expected to optimise Cykel AI's operational costs. These combined advantages will accelerate time to market and technical capabilities across Cykel's growing portfolio of autonomous digital workers - Lucy (recruitment), Samson (research analysis) and Eve (sales) - and further automate high-value business workflows.

Ewan Collinge, CEO & Founder of Cykel AI, commented: "Joining NVIDIA Connect represents a significant enhancement to our technological infrastructure. NVIDIA's AI acceleration capabilities perfectly complement our TaskOS platform, allowing us to further optimise the performance of our digital workers whilst reducing computational costs. This collaboration supports our mission to democratise access to enterprise-level AI solutions for businesses of all sizes."

This announcement comes as the Company continues to experience traction across its digital worker portfolio, with an expanding pipeline of enterprise engagements and early adopter deployments. The enhanced technical capabilities offered through NVIDIA Connect are expected to further accelerate product development and market penetration in Q2 2025.

About Cykel AI

Cykel AI creates autonomous digital workers that perform complex business tasks without human supervision. The Company's expanding portfolio includes Lucy (recruitment), Samson (research analysis), and Eve (sales), all built on TaskOS - Cykel's proprietary AI agent infrastructure. Cykel's digital workers operate alongside human teams, enabling businesses of all sizes to transform their operations at scale.
